PROFESSIONAL SUMMARY

Detail-oriented DevOps Engineer and Full-Stack Developer with hands-on experience in backend development, web application development, and deployment automation. Skilled in Docker, Linux, Git, CI/CD workflows, and modern web technologies for building scalable and efficient systems. Experienced in developing responsive applications, optimizing performance, and implementing automation solutions. Seeking roles in DevOps, software development, and infrastructure management.

TECHNICAL SKILLS

Programming Languages: Java, Python, PHP, HTML, CSS, JavaScript

DevOps & Cloud Tools: Docker, Kubernetes, Jenkins, Ansible, Git, Github, Linux, AWS EC2

Monitoring & Observability: Prometheus, Grafana

Web Development: React, Node.js, REST API

Databases: MySQL, MongoDB

Infrastructure & Networking: NGINX, Cloudflare Tunnel, Ubuntu Server

PROJECTS & EXPERIENCE

Vendora-Full-Stack E-Commerce Application with DevOps Integration

Jan 2026 – Present

Tech Stack: React, Node.js, Docker, Jenkins, Ansible, Grafana, Prometheus, Razorpay, NGINX

- Developed a scalable e-commerce platform using Node.js and REST APIs.
- Containerized application components using Docker for consistent deployments.
- Implemented CI/CD workflows using Jenkins, reducing deployment time by 40%.
- Managed source code and collaboration through Git and GitHub.

Wanderlite-Travel&Tourism Web Application

Oct 2025

Tech Stack: HTML, CSS, JavaScript, Python

- Developed responsive travel platform using HTML, CSS, JavaScript and Python.
- Built interfaces for destination exploration and trip planning.

GitHub Link: <https://github.com/semmozhiyan-dev/wanderlite-travel-and-tourism>

AirPreQ – Environmental Data Monitoring & Processing System

2025

Tech Stack: HTML, CSS, JavaScript, Python, Dockerfile

- Developed system for environmental data collection and analysis using Python and Docker.
- Built frontend interfaces using HTML, CSS, and JavaScript.

GitHub Link: <https://github.com/semmozhiyan-dev/AirPreQ>

Hospital Management System Tech Stack: Python - Developed desktop application using Python with role-based authentication. - Built modules for patient scheduling, billing, and record management. - Streamlined hospital administrative operations through automation.	Jul 2024
Self-Hosted DevOps Homelab Infrastructure Personal Project - Built and managed Ubuntu Linux server with Docker and Docker Compose. - Configured NGINX for service routing; set up Jenkins for CI/CD automation. - Deployed Prometheus and Grafana for monitoring and observability. - Integrated Cloudflare Tunnel for secure remote access. - Maintained production-style infrastructure for continuous DevOps learning.	Ongoing
Rotaract Club Website Rotaract Club of PPGIT - Designed and developed responsive official website for the Rotaract Club. - Implemented modern web development practices for event and member showcases.	sept-2024

EDUCATION

B.E. Computer Science & Engineering PPG Institute of Technology, Coimbatore,CGPA: 7.89	Expected 2027
AISSCE (CBSE-Class XII) Bharathiyar Hi Tech International School, Attur, Salem	2023
AISSE (CBSE-Class X) Akchara Bala Bhavan, Attur, Salem	2021

CERTIFICATIONS & AWARDS

- Oracle Cloud Infrastructure Foundations Associate – Oracle (Jan 2025)
- Programming Using Java Certification – Infosys Springboard (Jan 2026)
- Active Participant – Smart India Hackathon (SIH) 2024 & 2025
- Project Presenter – TechnoKreaticon
